Boltza® Solid single bolt Hose Clamp, Strong acid and alkali-resistant clamps can be used in areas requiring greater fastening force - such as agriculture, irrigation, drainage systems, sludge suction, large hose and reinforcement hose, using three-point projection welding, firm structure, with good durability and safety functions. The tongue and smooth underside provide a good contact surface for the hose, so they are also well-sealed. As a result, they are widely used in places where the tightening force of thick wall hoses is strong.

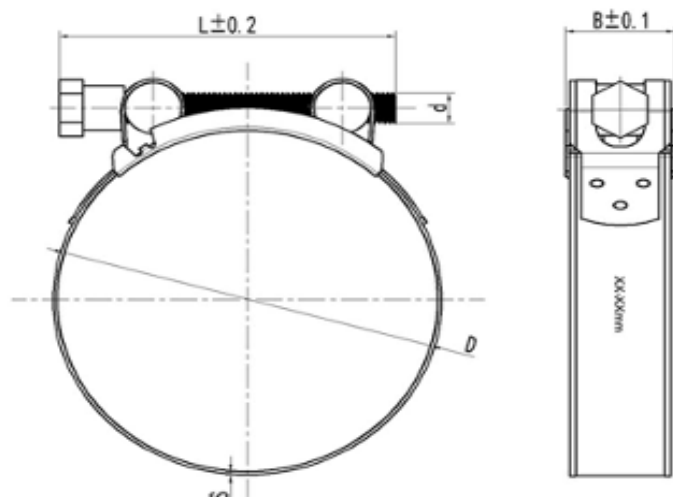

Product Specification:

- Material: Stainless Steel W1 & W4
- Fastening Type: M6 & M8
- Non-Hazarduos Product
- Clamps are RoHS compliant

HS Tariff Code: 73269092
